Managing the list of recipients

- At least one VT person is the *list owner*
- The *list owner* adds and deletes the e-mail addresses of desired recipients from the list as needed, using the listserv tool—see http://computing.vt.edu/email_and_calendar/listserv/index.html
- One or more e-mail addresses comprise the list of recipients
- Any e-mail address may be used, including addresses other than Virginia Tech addresses.
- List owners may change the default configuration of the lists as needed.
